

We are incredibly grateful for your purchase of Chirpie<sup>∞</sup>, our Personal Safety Alarm! We are committed to creating safer communities for women, children, and vulnerable individuals, and with your help, we are closer to accomplishing this mission.

### When to use it

When you're in a situation that causes alarm, and you need to alert those around you for assistance or to scare away potential assailants, Chirpie<sup>∞</sup> is the ideal answer.

A few scenarios where this could be useful include:

1. If you suspect you are being followed while walking alone.
2. You spot a potentially unsafe situation nearby, for example a suspicious person approaching children, and want to draw attention and scare away the attacker.
3. You require immediate assistance but cannot reach people with your voice.

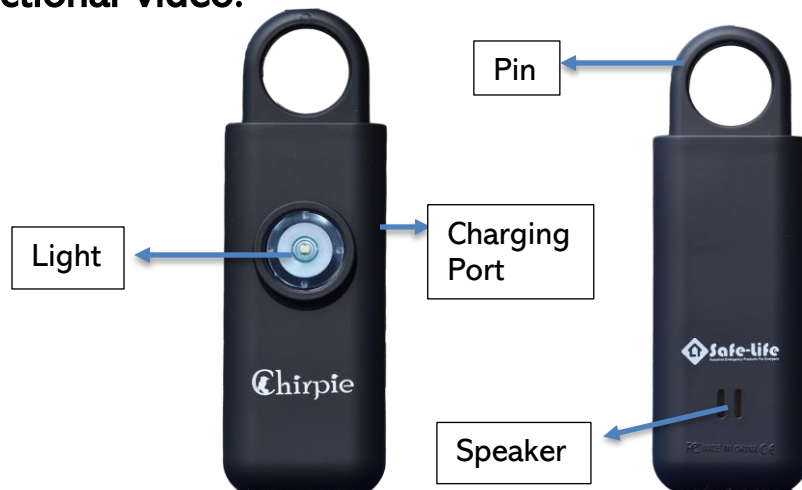

### What it does

When activated, Chirpie<sup>∞</sup> will emit a loud alarm noise and the built-in light will start flashing, both of which will continue until deactivated. The alarm duration is expected to last up to 90 minutes with full power.

### How to use it

- 1: Please remove the insulating sheet before using Chirpie<sup>∞</sup>.  
To activate Chirpie<sup>∞</sup>, simply pull out the pin.  
To stop the alarm, simply insert the pin back into the device.
- 2: Press in the side button to turn on the flashlight, let go to turn off the flashlight.
- 3: Low battery indicator will flash 10 times if pin pulled out or light button pressed.
