FREE SMOKE ALARM INSPECTION

More Australians die in residential fires than by all natural hazards combined. Many of these deaths could have been avoided if they had working smoke alarms.

- Do your smoke alarms actually work?
- Are they located correctly to ensure your safety?
- Are the batteries flat or even there?
- Are they more than 10 years old?
- Do they meet the new Queensland smoke alarm laws?
- Do they go off randomly – often in the middle of the night?

Our free Smoke Alarm Inspection Service is an initiative of SafetyEx Smoke Alarms provided as a community service. We will inspect and test your smoke alarms and provide advice and recommendations to help ensure you are fully protected. Our free service could help save the lives of you and your family.

To arrange your FREE smoke alarm inspection, call, email or book online

Offer available to home owners only, not available for rental properties.
